

VISION SUCCESS EDUCATIONAL INSTITUTE

UNA, HIMACHAL PRADESH

40-MINUTE SEMINAR • CLASS 9

THE QUIET ARITHMETIC.

Class 9 has no exam pressure, which is exactly why it decides more than Class 12 does.
A session about the invisible mathematics of small daily choices.

VisionSuccessUna.com • +91 82192 54332

Near Old Bus Stand, Near Sabji Mandi, Una, Himachal Pradesh 174303

Speaker script – not for distribution to students

Total time	40 minutes (35 speaking + 5 spare)
Structure	Hook Question Reveal Turn Close
Props needed	A one-rupee coin. A blank sheet of paper for each student (optional).
Tone	Curious, not commercial. You are a guide, not a seller.
Never do this	Do not name fees. Do not ask anyone to enrol.
Take-home	Command Card for their stream, handed out at the very end

Class 9 students do not need urgency. They need to be told that they are already building something.

PRE-SESSION CHECKLIST

A C T O N E

The Cold Open.

00:00

WALK IN. SAY NOTHING.

Walk to the centre. Do not introduce yourself yet. Hold up a one-rupee coin so the back row can see it. Wait until the room goes quiet on its own – it will take about eight seconds and it will feel like a minute. Let it.

Do not fill the silence. The silence is the hook.

I am going to offer every one of you a deal. I can give you ten lakh rupees, right now, today. Or – I can give you one rupee, and every day for thirty days I double it. Hands up for the ten lakh.

01:30

TAKE THE VOTE.

Most hands go up for the ten lakh. Count them. Say the number out loud. Then ask who chose the rupee, and look genuinely interested in them.

Do not reveal the answer yet. Let them sit in it.

The rupee that doubles is worth more than fifty crore. On day fifteen it is only sixteen thousand – which is why almost nobody picks it. It looks like nothing, right up until it is everything.

03:30

THE TURN TO THEM.

Now, and only now, say your name and the institute's name – once. Then say the line that reframes the whole session: this is not a lesson about money.

You are in Class 9. There is no board exam this year. Nobody is watching you very closely. And that is precisely why this is the year that decides the most – because this is your day fifteen.

NOTES

A C T T W O

The Reveal.

06:00

THE TWO STUDENTS.

Describe two students in this district. Same intelligence, same school, same village. One reads twenty minutes a day, every day. The other reads for six hours the night before each test. Ask the room which one is working harder right now. They will say the second – and they are right.

Over four years, the twenty-minute student has read for roughly five hundred hours. The night-before student has read maybe eighty. Same brain. Same village. Six times the mind.

09:00

WHAT CLASS 9 ACTUALLY IS.

Explain, plainly: Class 9 is the year the foundation of Physics, Chemistry, Mathematics and Biology is laid. Every entrance exam they will ever sit – NDA, JEE, NEET, even the SAT – is built on concepts introduced in Class 9 and 10, not on Class 12 material.

11:00

SHOW THEM THE MAP.

Name the roads. Engineering (JEE). Medicine (NEET). The defence academies (NDA – and tell them it can be written straight after Class 12). Merchant navy (IMU CET). Teaching (HP TET). Government services. Design, law, liberal arts. And studying abroad on the SAT.

Keep this fast and factual – 20 seconds per road. You are naming, not selling.

Every single one of those is open to somebody sitting in this room. Not one of them requires you to be born somewhere else.

15:00

THE FACT THAT LANDS.

Give them one hard, verifiable fact they have never heard. For Class 9: the SAT is accepted by more than 4,000 universities worldwide, has no age limit, and carries scholarships worth lakhs – and almost nobody in this district has been told it exists.

NOTES

ACT THREE

The Turn.

18:00

THE UNCOMFORTABLE QUESTION.

Ask it slowly, and mean it. Then give them ten seconds of silence to actually think.

**Who in this room has already decided what they are not good at? Keep your hand down.
Just answer it inside your own head.**

20:00

DISMANTLE IT.

Explain that in Class 9, 'I am weak in Maths' almost never means an inability. It usually means a chapter was missed in Class 7 and never repaired, and everything after it stacked on a gap. Gaps are fixable. Identities are not – which is why you must not turn a gap into an identity at fourteen.

**You are not bad at Mathematics. You are missing about nine hours of Mathematics.
Those are extremely different problems, and only one of them is a life sentence.**

24:00

THE COMPOUNDING HABIT.

Give the practical method, honestly: shrink the unit until starting is embarrassing (ten minutes), fix the time rather than the amount, allow yourself to begin badly, and protect the streak rather than the session.

28:00

THE THING NOBODY TELLS THEM.

Tell them that motivation is a feeling and feelings are unreliable employees – that the students who succeed are not the ones who feel like studying, but the ones who built a routine that does not ask how they feel.

NOTES

LANDING IT

The Close.

31:00

RETURN TO THE COIN.

Hold the rupee up again. The room will remember it. Let the callback do the work – do not over-explain it.

You will not see the difference this year. You will barely see it next year. Somewhere around Class 11 it will stop being invisible, and by Class 12 everyone will call it talent. It is not talent. It is day fifteen.

33:00

HAND OUT THE CARDS.

Distribute the printed Command Card for their stream. Say clearly that it is free, it is theirs, and they may photograph it, share it, or give it to a friend in another school.

This is the only moment the institute's name appears again. Do not add a pitch.

35:00

QUESTIONS.

Open the floor. Answer honestly – including 'I don't know, but I'll find out and send it to your school'. Never convert a question into an advertisement.

39:00

LEAVE ON TIME.

End early rather than late. Thank the teacher by name. Walk out without lingering to collect contacts – that single restraint is what makes a school invite you back.

Leave them with the coin, not the institute. The ones who remember the coin will find you.

WHAT THEY ASKED ABOUT
