

• A PROPOSAL FOR YOUR SCHOOL · THE DIGITAL SAT

Your students already study for the SAT. *Nobody has told them.*

The algebra, the data and the English your teachers already teach are what the SAT tests. We would like one period to tell your students it exists — and where it can take them.

1600

1540 — the score our SAT mentor earned on this exam. 99th percentile — the top 1%.

40

minutes — one period

₹0

to the school or families

8

test dates a year, in India

60

Indian institutions use it

20 lakh+

students in the US class of 2025 took the SAT (College Board, 2025).

12.5 lakh

Indian students were at universities abroad on 1 January 2025 (MEA, Rajya Sabha).

NEP 2020

Para 17.8 calls for “career counselling in schools towards identifying student interests and talents”.

Every figure in this brochure is taken from its primary source. We would rather be checked than believed.

A NOTE TO THE PRINCIPAL

A student in Una and a student in Delhi sit the identical paper.

The only difference has been who was told it existed.

Dear Principal,

The SAT is one digital exam, two hours and fourteen minutes long, that more than 4,000 colleges and universities in the US and 65 other countries consider SAT scores in admissions. In India, 60 institutions use it too — Ashoka, Plaksha in Mohali, FLAME, O.P. Jindal, Shiv Nadar, NMIMS and more.

It is not a new subject. SAT Math is the algebra, functions, data and geometry of Classes 9 to 11; SAT Reading and Writing is the reading and grammar your English teachers already teach. What a student in Una has lacked is not ability. It is information — and someone nearby who has sat the exam.

We opened the first SAT desk in the district because our SAT mentor did exactly that: he scored **1540 of 1600** — the 99th percentile — studied abroad on it, and came home to teach it.

We are asking for one period. Forty minutes for Classes 9 to 12, free to the school and to every family, with a teacher in the room and the script in your hands beforehand. Nothing is sold. If your students are interested afterwards, they know where we are; if your school wants more, we will design it with you.

This brochure is the whole case. It is short because we would rather you read all of it.

Vision Success

Una · founded and led by an NIT Hamirpur alumnus · 13+ years in Una

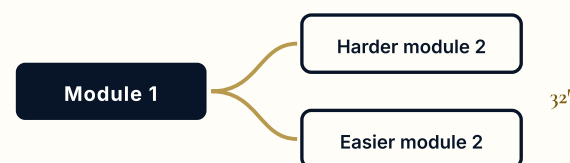

THE DIGITAL SAT

The exam, *on one page.*

The Digital SAT takes 2 hours 14 minutes of testing time. Reading and Writing has 54 questions in 64 minutes (two 32-minute modules); Math has 44 questions in 70 minutes (two 35-minute modules). In each section the second module is harder or easier depending on how the student did on the first.

READING AND WRITING

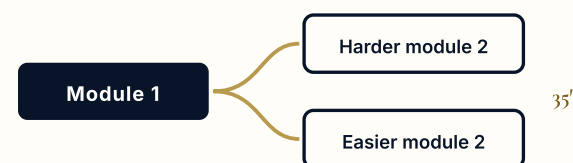

54 questions · 64 minutes

Information and Ideas · Craft and Structure · Expression of Ideas · Standard English Conventions

MATH

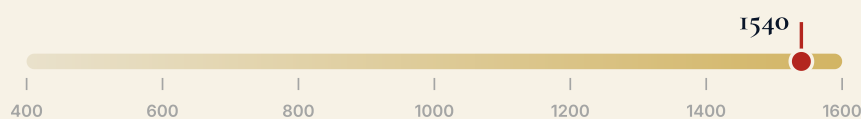

44 questions · 70 minutes

Algebra · Advanced Math · Problem-Solving and Data Analysis · Geometry and Trigonometry

THE SCORE

Scores run from 400 to 1600 — two sections of 200 to 800 each. No marks are taken off for wrong answers, and College Board advises students to guess rather than leave a question blank.

Marked: 1540, our SAT mentor's score — the 99th percentile of SAT test takers (College Board user percentiles).

CALCULATOR

A Desmos calculator is built into the Bluebook testing app and can be used throughout the Math section. No calculator is allowed on Reading and Writing.

ATTEMPTS

College Board says students can take the SAT as many times as they want. College Board recommends taking the SAT at least twice — in the spring of Class 11 and the autumn of Class 12.

RESULTS

Scores are released on dates College Board publishes, about two weeks after the test.

WHICH SCORES GO

With Score Choice, students choose which test dates' scores to send. Some colleges and scholarship programmes require all scores; some colleges "superscore", using the best section scores across dates.

FEE

For SAT dates through December 2026, a student testing in India pays US\$111 — the US\$68 registration fee plus a US\$43 international fee. Late registration adds US\$38.

2026–27 DATES OPEN IN INDIA

TEST	REGISTER BY	
22 AUG 2026	7 Aug 2026	held
12 SEP 2026	28 Aug 2026	held
3 OCT 2026	18 Sep 2026	registration closed
7 NOV 2026	23 Oct 2026	open
5 DEC 2026	20 Nov 2026	open
6 MAR 2027	19 Feb 2027	open
1 MAY 2027	16 Apr 2027	open
5 JUN 2027	21 May 2027	open

College Board's international calendar, 2026–27. Scores about two weeks after each test.

WHERE IT LEADS

One score. *Many doors — some in Mohali.*

4,000+

colleges and universities in the US and 65 other countries consider SAT scores in admissions (College Board).

60

Indian institutions use SAT scores to admit Indian residents (College Board's "SAT Acceptance in India", September 2026).

IN INDIA — CHECKED ON EACH UNIVERSITY'S OWN ADMISSIONS PAGE

Ashoka University SAT optional; can support a firm offer	Sonipat
Plaksha University B.Tech — a firm offer can come through the SAT	Mohali
FLAME University SAT in place of its own entrance test	Pune
O.P. Jindal Global University SAT 1100+ exempts its entrance test	Sonipat
Krea University SAT can take you straight to the interview	Sri City
Shiv Nadar University SAT considered in undergraduate selection	Delhi-NCR
Mahindra University SAT as an alternative to JEE Main for B.Tech	Hyderabad
NMIMS SAT for selected undergraduate programmes	8 campuses
Bennett University SAT as a route to undergraduate admission, incl. B.Tech	Greater Noida
Ahmedabad University Considers applicants who apply with SAT scores	Ahmedabad
Amity University SAT for all undergraduate programmes	Noida

ABROAD — HOW IT IS ACTUALLY USED

United States

Accepted at nearly all four-year colleges; some, such as MIT and Yale, are need-blind for international applicants.

MIT · Yale

Canada

Optional, and considered if the student chooses to send it.

University of Toronto · McGill University · University of British Columbia

United Kingdom

Accepted together with AP exams — never on its own.

University of Oxford · University of Cambridge · UCL

Singapore

NUS accepts the SAT with at least three AP courses; NTU accepts SAT 1250+ for its English requirement.

NUS · NTU

Australia

Accepted from international applicants alongside a completed school qualification.

University of Melbourne · University of Sydney · ANU · UNSW Sydney

We tell students the truth about this too: in the UK and at NUS the SAT works only alongside AP exams, and aid for international students is competitive. Some US universities, including MIT and Yale, consider international applicants without regard to their ability to pay and meet their full demonstrated financial need.

Sources: international.collegeboard.org; the admissions pages of each university named, checked 24 September 2026. Manipal, VIT, Christ, SRMIST and Symbiosis International are left off because their own pages did not confirm an SAT route for Indian students.

FOR YOUR SCHOOL

Why a school *says yes*.

- 1 It costs your timetable one period.**
The session is forty minutes. Nothing about your syllabus, calendar or board preparation changes.
- 2 Your students already study for it.**
SAT Math is the algebra, functions, data and geometry of Classes 9 to 11; SAT Reading and Writing is the reading and grammar your English teachers already teach. The SAT does not add a subject — it rewards the ones you teach.
- 3 It widens the map for every student.**
One score is considered by 4,000+ colleges in the US and 65 other countries — and by 60 institutions in India, from Ashoka to Plaksha in Mohali. A student who never leaves the country still gains an option.
- 4 It is something to tell parents.**
A school that shows its students the routes the rest of the world uses is a school parents talk about.
- 5 Zero cost, zero risk.**
Free to the school and families; nothing sold; a teacher present; the script yours to read first. If it is not useful, you simply do not invite us back.

WHAT THE SAT TESTS — AND WHERE YOUR STUDENTS ALREADY MEET IT

SAT DOMAIN (COLLEGE BOARD)	IN YOUR CLASSROOMS
Algebra	Linear equations, inequalities and systems — Classes 9 and 10
Advanced Math	Quadratics, polynomials, functions and exponentials — Classes 10 and 11
Problem-Solving and Data Analysis	Ratios, percentages, statistics and probability — Classes 9 to 11
Geometry and Trigonometry	Triangles, circles, area and volume, trigonometric ratios — Classes 9 and 10
Reading and Writing	Reading comprehension, vocabulary in context, grammar and punctuation — the English syllabus, Classes 9 to 12

“Career counselling in schools towards identifying student interests and talents.”

NATIONAL EDUCATION POLICY 2020, PARA 17.8

FOR YOUR STUDENTS

The road *from Class 9.*

College Board recommends taking the SAT at least twice — in the spring of Class 11 and the autumn of Class 12. In Indian terms: a first sitting in the spring of Class 11, a second in the autumn of Class 12.

**CLASS 9**

Hear about it

Know the exam exists and what it rewards. Read every day; get the algebra right.

**CLASS 10**

Build the base

Finish the core Math the SAT tests; start timed reading. A first diagnostic shows the starting point.

**CLASS 11**

First real sitting

Prepare in the autumn and winter; sit the SAT for the first time in the spring.

**CLASS 12**

Best score, then apply

A second sitting in the autumn — as College Board recommends — then applications with the best score.

A CLASS 11 STUDENT IN YOUR SCHOOL TODAY

Prepares through the winter and sits the SAT for the first time on **6 MAR, 1 MAY, 5 JUN** — the 2027 spring dates — with a second attempt in the autumn of Class 12.

A CLASS 12 STUDENT TODAY

Can still sit this year: the next dates open for registration are **7 NOV 2026 or 5 DEC 2026**. Scores are released on dates College Board publishes, about two weeks after the test.

A CLASS 9 OR 10 STUDENT

Needs no coaching yet — just to know the exam exists, to read every day, and to get the algebra right. That is what the session gives them.

No penalty

for a wrong answer — a guess can only help.

Adaptive

the second module adjusts to the student.

Their choice

of which test dates' scores to send (some colleges ask for all).

US\$III

to register in India, for dates through December 2026.

WHO WILL STAND IN FRONT OF YOUR STUDENTS

Three people. *No franchise.*

Not a chain and not a rotating panel of visiting faculty — three people who teach the classes themselves.

SAT MENTOR

Scored 1540 / 1600 on the SAT. Studied abroad. Came home to teach it.

A student from this district, on the identical paper a student in Delhi or Boston sits. He went abroad on it, came back, and opened the first study-abroad desk Una has had. He teaches the SAT and IELTS here — from the inside of the exam.

TEACHES

SAT · IELTS · study-abroad applications

FOUNDER

NIT Hamirpur alumnus. Thirteen years teaching in Una.

He founded Vision Success and has taught in this town for over thirteen years. He is the reason batches are capped at fifteen: if he cannot tell you which chapter each student is stuck on, the batch is too big.

TEACHES

Mathematics · JEE · NDA · Class 11–12 boards

PHYSICS

Physics — and the part of life where money is the physics.

He teaches Physics as a story about how the world behaves, and the money side of a career — what a degree costs, what it returns, what a scholarship is genuinely worth.

TEACHES

Physics · financial literacy · the economics of a career decision

FOUNDED & LED BY An NIT Hamirpur alumnus

SAT MENTOR Scored 1540 / 1600; studied abroad

TEACHING SINCE 13+ years in Una

DEFENCE RECORD 7+ students now serving as officers

MEDICAL RECORD 50+ MBBS admissions

BATCH SIZE Never more than 15 students

SAT DESK The first in the district

All of it is verifiable, and we would rather be checked than believed.

ONE QUESTION, TAUGHT THE WAY WE TEACH IT

Ninety-five seconds, *and one trap*.

An original question in the style of the Digital SAT — Math, Advanced Math. The real exam allows about 95 seconds per Math question (70 minutes ÷ 44).

MATH · ADVANCED MATH

~ 95 S

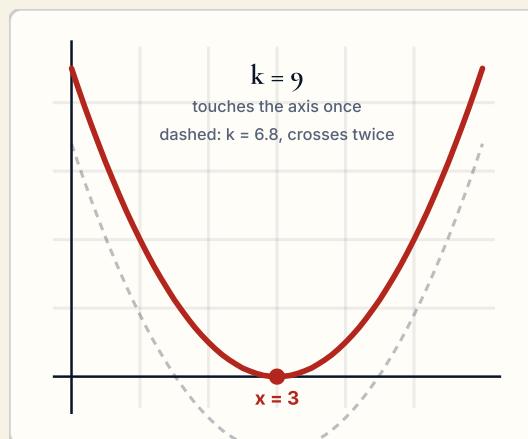

The function f is defined by $f(x) = x^2 - 6x + k$, where k is a constant. In the xy -plane, the graph of $y = f(x)$ touches the x -axis at exactly one point. What is the value of k ?

(A) 3

(B) 6

(C) 9

(D) 36

The Desmos way: graph $y = x^2 - 6x + k$, drag k until the curve just touches the axis.

THE TRAP

Choosing 36 — the value of b^2 , not k . Half of SAT Math is noticing which number the question actually asked for.

1

Touching the x -axis at exactly one point means one repeated root — the discriminant is zero.

2

$b^2 - 4ac = 0$ gives $36 - 4k = 0$, so $k = 9$.

3

Or skip the algebra: type $y = x^2 - 6x + k$ into the built-in Desmos calculator, drag the k slider until the curve just kisses the axis, and read $k = 9$.

Every class runs like this: the question, the trap, two routes to the answer, and the clock. Two more questions are on our website for your students to try.

WHAT WE OFFER YOUR SCHOOL

Three offers. *You choose.*

I**“The SAT, explained” —
a 40-minute session****CLASSES 9 TO 12 · ONE
PERIOD**

What the exam is, when to sit it, what it costs, where it leads — in Hindi and English, with the official dates. Every student leaves with a printed “SAT at a glance” card.

**Free to the school and to
families**

2**A free diagnostic for any
student who asks****INDIVIDUAL STUDENTS, AT
OUR DESK**

A short diagnostic and an honest read of where the student stands, with a written plan — target score, test date, weekly schedule. The student keeps the plan whether or not they ever enrol.

Free

3**An SAT track for your
school — designed with
you****IF YOUR SCHOOL WANTS
MORE**

A regular batch for your students — at your school or at our desk, around your timetable. We sit down with you and design it; nothing is decided without you.

**Agreed with the school, in
writing**

OUR UNDERTAKINGS

- **Nothing is sold in your school.** No fee is mentioned in front of a class, no forms are circulated, no phone numbers are collected during the session.
- **You may read the script first.** The forty minutes is written down, minute by minute, and sent to you before we arrive.
- **A teacher stays in the room.** Any teacher or the principal is welcome to sit through the whole session. We would honestly prefer it.
- **Every figure has a source.** Every date and number we say about the SAT is from the College Board or the university that publishes it. We will show you where.

HOW IT WOULD WORK

- I You tell us a date**
A single WhatsApp message or the form on /sat/schools — a period, a class, a day.
- 2 We send the script**
The full session, in writing, for you to read or change.
- 3 We arrive early**
Twenty minutes before the period; a classroom and a board are all we need.
- 4 Forty minutes**
The session, with a teacher present. Questions answered in the room.
- 5 The card stays**
Every student keeps a printed SAT-at-a-glance card.
- 6 A written note**
A short summary to the school of what was covered and what students asked.

THE ASK

One period. *One date.*

If this is useful, a single message with a possible date is all it takes. We will handle the rest and confirm everything in writing.
