

VISION SUCCESS EDUCATIONAL INSTITUTE

UNA, HIMACHAL PRADESH

A PROPOSAL FOR YOUR SCHOOL

CAREER CLARITY, BEFORE IT'S LATE.

A free 40-minute career-awareness seminar for your students – no fees, no sales pitch, no obligation. Just the information most students in Himachal receive two years too late.

Prepared for the Managing Director / Principal

THE REASON WE ARE WRITING

Your Students Are Deciding Blind.

By the time a student reaches Class 12, the most consequential decisions of their life have usually already been made – often by default, on incomplete information, and rarely with any real map of what exists beyond the district.

A child who does not know an option exists has not rejected it. They were simply never told.

- **Information reaches this district late.**

The SAT, the NDA's real mark structure, the top-20-percentile rule that can replace the 75% board cut-off for NIT admission – all of it is published openly, and almost none of it arrives in time to be acted on.

- **The cost of a late decision is a whole year.**

A student who discovers in Class 12 that they needed Physics, or a two-year runway, or an exam window that has closed, pays for that gap in years – not marks.

- **Nobody is at fault.**

Teachers are stretched, parents advise from their own experience, and students cannot research what they have never heard named. It is a gap in information, not in effort.

- **And the information itself is free.**

Every figure we quote comes from the UPSC, the NTA or the College Board. None of it is privileged. It is simply not evenly distributed – and that is a solvable problem.

This is the entire reason we are asking for forty minutes.

WHAT WE ARE OFFERING

One Free Session. Nothing Sold.

Duration	40 minutes – one period
Audience	Class 9, 10, 11 or 12 (separate script for each)
Cost to school	Zero. No fee, no sponsorship, no expenses
Cost to families	Zero. Nothing is sold to students
What we need	A hall or classroom, and a projector if available
What we bring	The session, printed take-home material, our own equipment

We do not pitch our institute to students. We give them the map, and we leave.

- **The session is class-specific.**

A Class 9 student needs a different conversation from a Class 12 student. We have written four separate scripts so each year hears what is actually useful to them right now.

- **You may read the script before we arrive.**

The full forty minutes is written down, minute by minute, and we will send it to you in advance on request. Nothing will be said in front of your students that you have not had the chance to read first.

- **Nothing is collected from students.**

We do not take phone numbers, we do not circulate forms, and we do not ask anyone to sign anything. Students who want to reach us afterwards can find the website on their card.

Ask us for the script. It is the fastest way to judge whether this is worth a period.

WHAT STUDENTS WALK AWAY WITH

The Map Nobody Gave Them.

- **Every route that exists after Class 12.**

Engineering and medicine, yes – but also the defence academies, the merchant navy, the teaching services, design, law, liberal arts, and studying abroad on scholarship. Named, explained, with the entry exam and the timeline for each.

- **The real structure of the exams they will face.**

That the NDA written paper is 300 marks of Mathematics against 600 of General Ability. That NEET is 720 marks of which Biology alone is exactly half. That JEE Main runs twice a year and only the better score counts.

- **That studying abroad is not only for the wealthy.**

The SAT is scored out of 1600, runs on eight Saturdays a year in India, and carries substantial merit scholarships. Most students here have never had it explained.

- **A method for the year ahead.**

How to build a study routine that survives a bad week – the practical, unglamorous discipline that separates students who finish from students who start.

Not one minute of the session asks a student to enrol anywhere.

Every fact quoted in the session comes from the official exam body. We will cite them on request.

WHO WILL BE STANDING IN FRONT OF THEM

It Is Run By Three People.

Not a franchise, not a chain, not a rotating panel of visiting faculty. Three people who teach the classes themselves – and who each arrived at teaching from a different direction.

1

THE ONE WHO LEFT, AND CAME BACK

Scored 1540/1600 on the SAT. Studied abroad. Came home to teach it.

A 1540 is a top-one-percent score worldwide, sat by a student from this district, on the identical paper a student in Delhi or Boston sits. He went abroad on it and then did the strange thing: he came back, and opened the first study-abroad desk Una has ever had. He teaches the SAT and IELTS here – not from a manual, but from the inside of the exam.

“Geography decides where you are born. It does not decide where you sit the paper.”

TEACHES: SAT · IELTS · study-abroad applications

2

THE ONE WHO BUILT IT

NIT Hamirpur alumnus. Thirteen years teaching in Una.

He founded Vision Success and has taught in this town for over thirteen years – long enough that some of his students now send their own children. Seven-plus of them are serving as commissioned officers; fifty-plus went into MBBS. He is the reason the batches are capped at fifteen: he refuses to teach a room he cannot read.

“If I cannot tell you which chapter each student is stuck on, the batch is too big.”

TEACHES: Mathematics · JEE · NDA · Class 11-12 boards

Continued overleaf.

THE THIRD

And The One Who Breaks Things.

3

THE ONE WHO THINKS MISTAKES ARE THE SYLLABUS

Physics, and the part of life where money is the physics.

He teaches Physics as a story about how the world actually behaves, and he teaches the money side of a career – what a degree costs, what it returns, what a scholarship is genuinely worth – because no one else in a student's life does. His classroom rule is the one students remember longest: a wrong answer is not a verdict, it is data. He wants the mistake made here, in front of him, where it is still cheap.

“You do not learn Physics by being right. You learn it by being wrong in public, on purpose.”

TEACHES: Physics · financial literacy · the economics of a career decision

Between them: the exam, the engineering, and the money. A student gets all three answers in one room.

Founded & led by	An NIT Hamirpur alumnus
SAT mentor	Scored 1540/1600 – top 1% worldwide; studied abroad
Defence record	7+ students now serving as officers
Medical record	50+ MBBS admissions
Teaching since	13+ years in Una
Batch size	Never more than 15 students

We have deliberately not printed any student's name or photograph in this document.

WHAT THIRTEEN YEARS PRODUCED

The Record, Plainly.

- **We teach the whole spread.**

NDA, JEE, NEET, CUET, Merchant Navy, HP TET and government exams, Class 9-12 boards, and the SAT and IELTS for students aiming abroad.

- **We are the first SAT desk in the district.**

Which is precisely why students here have never had the option explained to them. A student in Una and a student in Delhi sit the identical paper – the only difference has been who was told it existed.

- **We are a small institute, and we say so.**

Batches are capped at fifteen because that is the size at which a teacher still knows which chapter each student is stuck on. We are not the largest coaching centre in Himachal and we have never claimed to be.

- **Fees are discussed privately, never published.**

They are set per family, in a conversation, and nothing about them is ever mentioned in front of a class. No student in your school will hear a price from us.

Thirteen years in the same town. You cannot survive that long here on marketing alone.

All of it is verifiable, and we would rather be checked than believed.

SOMETHING WE BUILT OURSELVES

Every Student Gets The App.

We were not satisfied with students going home and having nothing but a notebook, so we built our own study app. It is not a video library bought off a shelf – it is written for our syllabus, our batches and our students, and it is included at no extra cost.

- **For the student: practice that adapts.**

Chapter quizzes and adaptive tests that get harder as the student gets better, 3D concept labs for Physics and Chemistry, a formula vault, daily challenges, and streaks that make showing up every day feel like something.

- **For the student: everything in one place.**

Notes, syllabus tracking, reminders, a study log, and progress reports – so a student always knows exactly where they stand, chapter by chapter.

- **For the parent: a window, not a rumour.**

A separate parent login with attendance, test performance and periodic briefings. Parents stop having to ask “how is my child doing” and simply look.

- **Built and maintained here.**

We wrote it, we run it, and we change it when a batch needs something changed. No subscription, no upsell, no advertisements shown to your students.

A student should never have to guess how far behind they are. The app answers that in one screen.

Runs on	Android phones – the ones students already have
Costs	Nothing extra. Included with the batch
Advertising	None. We do not sell attention
Parent access	Separate login, attendance and progress

We are glad to demonstrate the app in the staffroom before or after the session.

WHAT THE SCHOOL GAINS

Reasons To Say Yes.

- **Career guidance your timetable cannot fit.**

Most schools want to run career sessions and simply have no period to spare and no external speaker to call. This costs you one period and nothing else.

- **Better-informed board students.**

A Class 10 student who understands what stream selection actually decides makes a better choice – and better choices show up in your board results two years later.

- **Something to tell parents.**

"We brought in an external career-awareness session for your child, free of charge." It is a genuinely good line at a parent meeting, and it is true.

- **Zero risk.**

No money changes hands. Nothing is sold to students. A teacher is present throughout. If the session is not what we described, you never have to invite us back.

- **A written summary afterwards.**

We send the school a short note on what was covered and what the students asked about – often the most useful part, because their questions reveal what the year group is worried about.

If it does not go well, you simply do not invite us back. That is the whole downside.

PRACTICALITIES

How It Would Work.

- | | |
|---------------|---|
| Step 1 | You tell us a date, a class, and a time |
| Step 2 | We share the exact script in advance, if you wish |
| Step 3 | We arrive 20 minutes early and set up |
| Step 4 | 40-minute session, with a teacher present |
| Step 5 | Printed material distributed; we leave on time |
| Step 6 | A short written summary sent to the school after |

- **We will work around your calendar.**

Before or after board exams, during a career week, in the last period, on a Saturday – whatever disrupts teaching least.

- **A hall is preferred; a classroom is fine.**

The session works in a hall of three hundred or a room of thirty. A projector helps but is not required – the script is written to work without one.

- **Language.**

Delivered in Hindi and English together, the way students in Una actually speak, so nothing is lost to the back rows.

- **Repeat visits are welcome, never demanded.**

Some schools invite us once a year for their Class 10 stream-selection week. Others invite us once and never again. Both are completely acceptable to us.

One message with a possible date is genuinely all that is required to begin.

THE ASK

One Period. One Date.

If this is of interest, a single message with a possible date is all that is needed. We will handle the rest and confirm everything in writing.

Every student in your school will make these decisions anyway. The only question is whether they make them with the information, or without it.
